Coworking Rooms

A real-time room-availability app for a study centre — visitors see live status, floor plan and alerts; admins publish events that instantly push to everyone.

Next.js 16 + MongoDB

Coolify · SSL · CI/CD

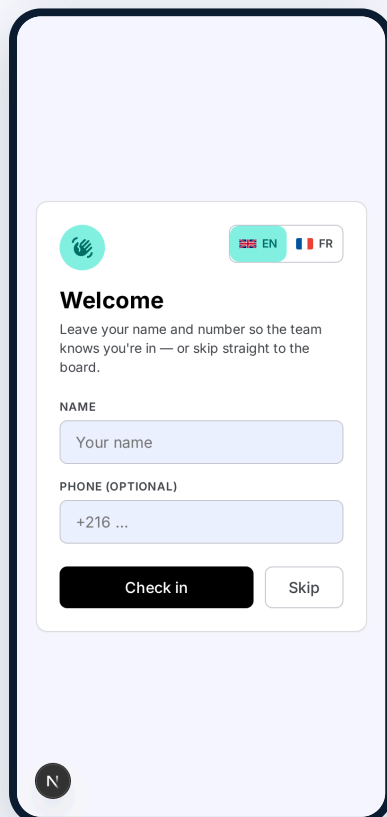

1

Pick your access

One screen, three roles. The whole app opens from here.

- **Visitor** — browse rooms & get alerts
- **Guest** — walk straight in, no login (preselected)
- **Admin** — sign in to manage the space

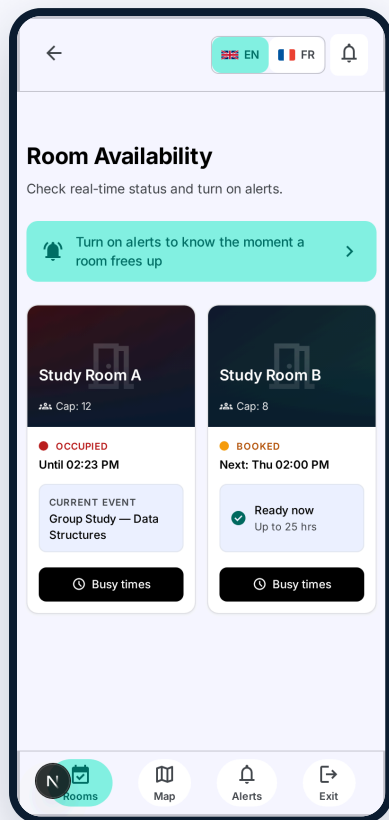

2

Frictionless check-in

Visitors can leave a name & phone so the team knows who's in — or Skip straight to the board.

- Optional, one tap to skip
- Remembered — only asks once
- Feeds the admin's Visitor log

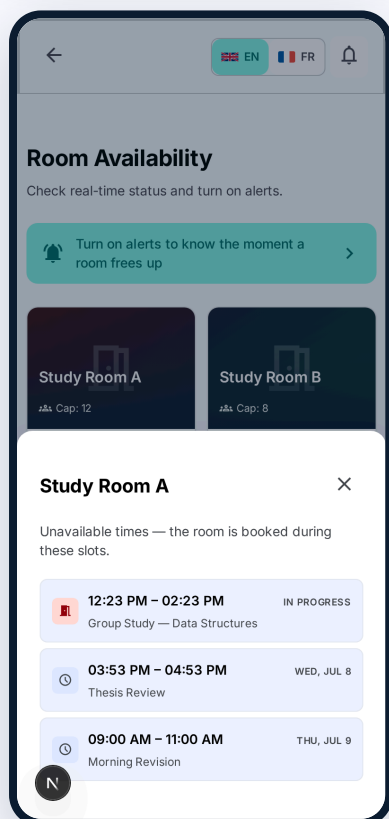

3

Live room board

Real-time status for both study rooms, updating on its own.

- Free · Booked · Reserved-today states
- Capacity + next booking time
- One-tap "turn on alerts" opt-in

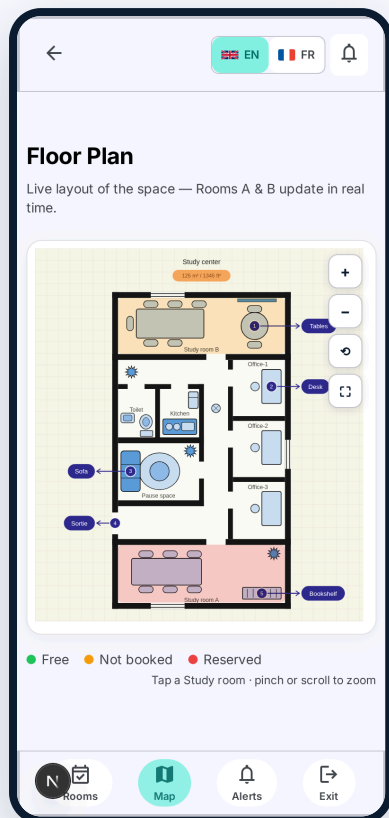

4

Busy times at a glance

Tap a room to slide up its unavailable slots — so you know exactly when it's free.

- Upcoming booked slots, soonest first
- "In progress" highlighted
- Compact bottom-sheet, easy to dismiss

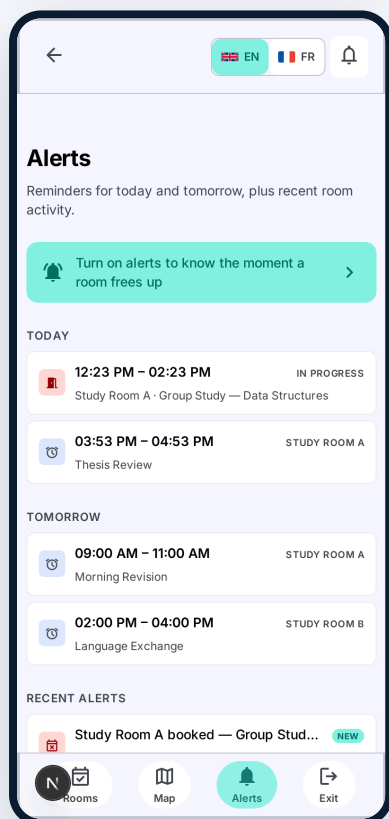

5

Interactive floor plan

The real layout of the space, colour-coded live.

- Study rooms tint green / amber / red by status
- Pinch or scroll to zoom, drag to pan, fullscreen
- Tap a room for its live details

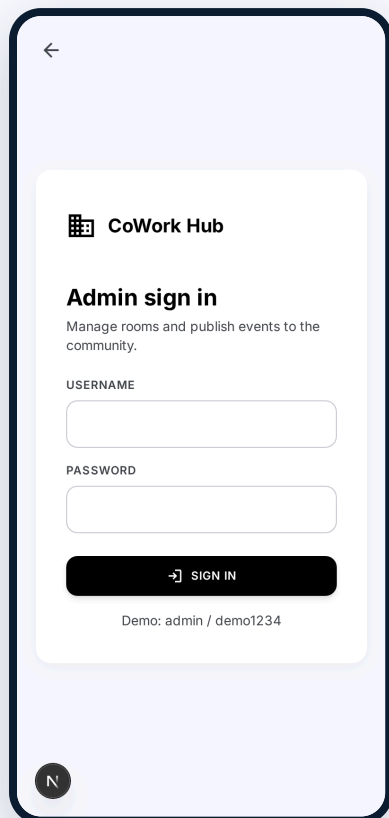

6

Smart alerts

Everything happening, at a glance.

- Reminders for today & tomorrow
- Recent activity feed — booked / freed
- "New" badge on fresh alerts

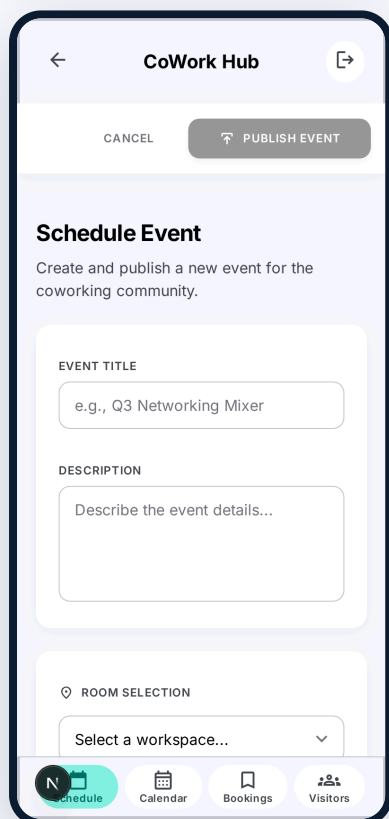

7

Secure admin

A password-protected control panel, fully separate from the public visitor experience.

- Clean Material sign-in
- Sidebar on desktop, bottom nav on mobile

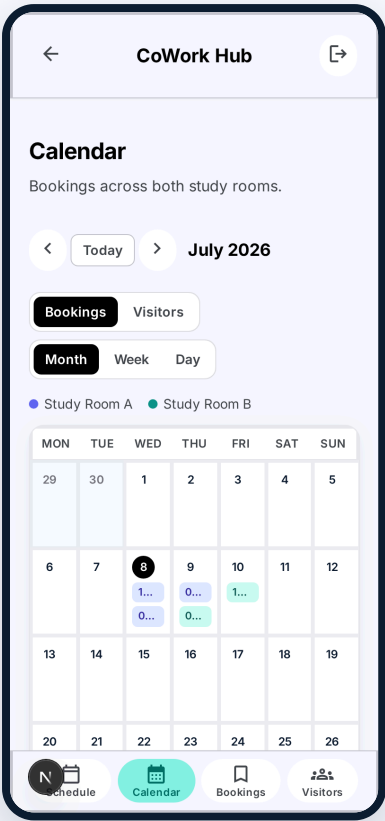

8

Publish an event

Schedule to a room with title, description, date & time.

- Publish button enables only when valid
- Instantly web-push notifies every subscriber
- No overlap allowed — clean scheduling

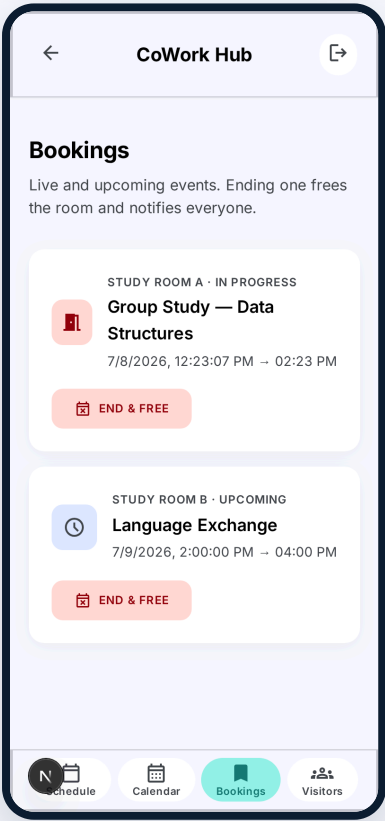

9

Booking calendar

A full calendar of the space — Month, Week or Day.

- Events colour-coded by room
- Switch between Bookings & Visitor check-ins
- Tap any entry for details

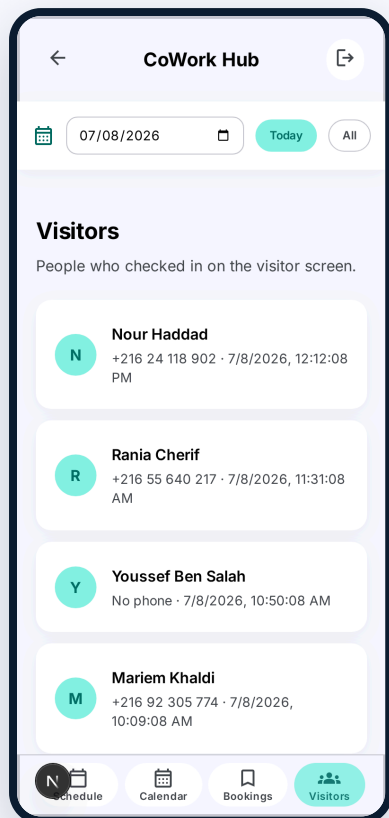

10

Manage bookings

See live & upcoming events across both rooms.

- End an event to free the room
- Everyone is notified in a tap

11

Visitor log

Everyone who checked in — filter by day with the calendar.

- Name, phone & check-in time
- Server-side date filter, defaults to today

+

And more

- Installable PWA — Add to Home Screen (incl. iOS)
- Web-push notifications on every room change
- EN / FR bilingual visitor experience
- Product guide downloadable inside the app
